## **PREFACE**

The Sentencing Advisory Commission is pleased to provide an annual report on sentencing in Missouri. The report is in fulfillment of its statutory responsibility to study sentencing practices and to report on variations and disparities around the state.

The report provides statistics on sentencing, the application of the death penalty and recidivism rates related to alternative sentences and prior criminal history.

The report has been produced with the assistance of professional staff in Department of Corrections and in the Office of the State Courts Administrator.

Suggestions for topics to be included in future reports are welcome.

## 1. FELONY SENTENCING IN MISSOURI 1986-2012

From 1986 to June 30, 2012 the prison population has increased from 9,711 to 31,057, an increase of 320%. The main reason for that increase has been the increase in felony sentences. Since FY1986 felony sentences have increased by 270% and what is most surprising, given the increase in the prison population, is that the percent of felony convictions that are sentenced to probation has changed very little. In FY1986 60.1% of offenders received probation and in FY2012 62.8% of offenders received probation. What has changed in the period was the growth of 120 day (559.15 RSMo) and long term drug sentences (217.262 RSMo) in the 1990s. The increase in shock probation and drug treatment has been an alternative to prison sentences. Since FY2000 the percent of prison sentences has been slowly increasing.

Average sentences for most offenses have not changed much over the last 26 years. In the last few years sentences for drugs have increased a little but the change that is significant is the increase in sentences for sex offenses.

Multiple sentences handed down on the same day and in the same court are counted as one sentence and the offense is the most serious in offense severity and length of sentences.

## **2. CIRCUIT AND COUNTY RANKINGS BY DISPOSITION IN FISCAL YEAR 2012**

When circuits are compared by sentence disposition or by average prison sentence there are wide variations in sentencing practice. Using the sentence data compiled by the Department of Corrections for FY12, the 45 Missouri circuit courts have been ranked using four measures:

### *1. Prison sentences as a percentage of all sentences*

The range is from 49.8% for circuit 18 (Cooper and Pettis counties) down to 14.0% for circuit 20 (Franklin, Gasconade, Osage). The average percentage is 25.5%. St. Louis City (28.5%) is in the top one third and St. Louis County (21.0%) and Jackson County (20.8%) are in the lowest one third.

### *2. Shock and Treatment as a percentage of Prison and Shock and Treatment Sentences*

The range is from 55.0% for circuit 12 (Audrain, Montgomery, Warren counties) down to 12.2% for circuit 29 (Cooper, Pettis counties). The average percentage is 31.0%. Jackson County (41.2%) is in the second quartile and St. Louis City (22.4%) and St. Louis County (23.9%) are in the lowest one third.

### *3. Average Prison Sentences*

St. Louis City has the highest average prison sentence (9.0 years) and Circuit 43 (Caldwell, Clinton, Daviess, DeKalb, Livingston) has the lowest average sentence (4.2 years).

### *4. Average of percent of incarcerated offenders with nonviolent offenses*

The range is from 71.7% of the population for circuit 8 (Carroll, Ray) to 19.9% for Jackson County. The counties with the lowest percentage of nonviolent offenders are the three metro counties (St Louis City, St Louis County and Jackson County). The average is 46% and the percent of incarcerated nonviolent offenders has been declining since 2005.

Although these rankings indicate that sentencing standards appear very different between courts, small numbers may add to variability and there may be differences in the level of crime, the type of crime and in the prior criminal history of the offender population. For example, St. Louis City has a higher percentage of violent crime than other circuits and that would explain the high average prison sentence in St. Louis City. The high volume of crime in St. Louis may explain the low proportion of sentences that result in a prison sentence.

To account for some of the underlying factors, the data has been aggregated into three types of circuit court based upon the size of the resident population and sentencing has been compared for similar offense groups. This analysis is presented after the circuit court ranking charts.

## Missouri County Felony Sentencing Rates for FY2012

Felony sentencing rates measure the number of offenders sentenced to prison for a felony offense. Incarceration rates also include the effect of revocations and the time served in prison.

#### 4. ANALYSIS OF GEOGRAPHIC VARIATIONS IN SENTENCING

Comparing sentencing when grouped into three geographical areas based upon size of population (Metropolitan, Other First Class Counties and Rural) indicates that the greatest differences are between the metropolitan areas and the rest of the state. The metropolitan areas have the highest prison sentences but the lowest percentage of prison sentences. Rural counties have higher percentages of probation and shock and treatment sentences than first class counties. Within the metro areas Jackson County has the highest percent of shock and treatment sentences but all three metro counties have similar prison percentages.

Comparing the three geographical areas for similar offenses reduces the disparity in prison sentences but the differences in sentence disposition remain. The metro areas have the lowest percent of sentences receiving prison sentences. This is true for drugs, DWI and other non-violent offenses. For violent offenses there is a much greater similarity in sentencing. For Class A, B and C felony violent offenses there is very little difference in disposition or prison sentence between the metropolitan counties and the other counties. For Class D violent offenses there is a difference.

## 5. ANALYSIS OF SENTENCING BY RACE

The most significant indicator of sentencing disparity by race is the incarceration rate in relation to the respective populations of Blacks, Hispanics and Whites. The Missouri incarceration rate for Blacks is over 4.7 times that of Whites and nationally the Black rate is over 4.1 times the White incarceration rate. The incarceration rate for Hispanics in Missouri is lower than for Whites and is only 40% of the national rate for Hispanics. The intent of the following analysis is to explain the reasons for the disparity.

**Incarceration Rate By Race, 2010**  
Rate per 100,000 population

	Missouri	US
Black	1,724	1,509
Hispanic	264	664
White	369	371
Total	509	964

Source: BJS Prisoners in 2010, Appendix tables 13 & 15

There are many factors, including socio-economic, that play an important part in explaining the differences in incarceration rates between racial and ethnic groups. The analysis the Commission has conducted attempts to identify the relative impacts of severity of offense, prior criminal history and time served in Missouri.

Using the sentencing data for FY12, the comparison between the four racial or ethnic groups indicates that Blacks have the highest average prison sentence, 7.2 years compared to an average of 5.5 years for Whites and Blacks also have a higher percent of prison sentences than Whites (27.8% compared to 23.4%). ‘Other’ includes Native Americans and Asian and Pacific Islanders.

Total	26,187	64.5	10.8	24.7	100.0	6.1

i. Severity of Offense

The disparity in sentencing between races could be explained by differences in the types of offense committed by the different races. The analysis by offense group indicates the Blacks are more likely to be sentenced to prison and/or have a longer sentence than Whites for drug offenses and for Violent C and D felonies. For the other offenses (DWI, Nonviolent, Sex and child abuse and Violent A and B felonies) there are no significant differences between the races.

## **ii. Prior Criminal History**

Prior criminal history could be a reason for differences in sentencing between the races because prior criminal history results in more severe sentencing. Blacks have the lowest percentage of offenders in Level I (no prior felony convictions) and the highest percentages in the other prior criminal history levels (Levels 2-5). The differences for Level III and higher are not, however, significant.

### iii. Combining Offense Group and Prior Criminal History

Level I has the greatest number of offenders in sentencing and the analysis below shows that Level I Blacks convicted of violent offenses are much more likely to be sentenced to prison. For drugs, DWI and nonviolent offenses there are no significant differences.

#### iv. Time Served Disparity by Race

The previous analysis examined variations in sentencing by race but the disparity that results in Blacks having a much higher incarceration rate than other races could also be the result of the release practices of the Missouri Board of Probation and Parole. For offenders sentenced to a prison sentence the Board of Probation and Parole has the discretionary responsibility to determine the release date, subject to statutory restrictions on minimum prison time and the statute that defines conditional release.

In FY12 the Department of Corrections released 5,236 offenders to the first release in their commitment. The average time served was 36.5 months and that comprised 50.1% of the aggregate sentence. Blacks served significantly more time than Whites (49.6 months compared to 31.9 months) in part because Blacks were sentenced to longer sentences (89.3 months compared to 68.1 months). As a percent of sentence Blacks also served longer than Whites (55.5% compared to 46.8%).

**Time Served, First release in commitment, FY12**  
**Term sentence**

Race/Hispanic	First Releases	Aggregate Sentence (mths)	Time Served (mths)	Percent Served

Other	32	75.6	35.9	47.5%
Total	5,236	74.8	37.5	50.1%

The analysis by offense group shows that Blacks serve a higher percentage of the sentence in prison than Whites for Drug, Nonviolent and Violent offenses. They also have longer sentences.

Board release decisions are based upon a parole hearing and a guideline release date that is determined by a salient factor risk assessment. The salient factor risk score includes measures of prior criminal history, institutional adjustment and other factors that have been tested to be correlated with recidivism. The salient factor risk score is race neutral. The final test for disparity in time served by the Board of Probation and Parole is, therefore, to measure the compliance by the Board with the guideline release dates for each of the races.

**Percent of Sentence Served and Guideline Percent of Sentence, Board Hearings FY12**

Race and Hispanic	Hearings	Average Sentence (mths)	Time Served (mths)	Actual Percent Served	Guideline Time (mths)	Guideline Percent Served	Difference between Actual & Guideline Percent Served
Black	2,053	76.7	37.7	49.2%	34.5	45.0%	4.2%

Total	6,908	66.0	29.1	44.1%	25.4	38.5%	5.6%

In FY12 there were 6,908 parole hearings for new admissions. For offenders given a release date the average time served for Blacks was 49.2% of the sentence. The guideline time served based upon the salient factor risk assessment was 45.0% of the sentence. The Board, therefore, set the time served 4.2% above the guideline time served. For Whites, the Board set the time served 6.5% above the guideline time served. The longer time served by Blacks can be attributed to higher risk factors by Blacks. The risk factors include prior criminal history, institutional adjustment, substance abuse, education, age and vocational skills.

Conclusions on Racial Disparity in Sentencing

The analysis of sentencing practice does not identify the major reasons for the very large difference in the incarceration rates between Blacks and Whites. Those reasons must lie before the commission and conviction of the crimes. In the main the reasons for longer sentences for Blacks are explained by the seriousness of the offenses and the greater level of prior criminal history.

## 6. DEATH PENALTY SENTENCING

The study analyzes recent trends in prison admissions for murder, including sentences that require the death penalty, and provides measures that identify racial and geographic disparity in the application of capital punishment.

### Sentencing for Murder (Chapter 565 RSMo.)

The death sentence for murder was re-imposed in Missouri in 1977 as capital murder and the authorized sentences were the death penalty or life with no parole for 50 years. In October 1984 Capital Murder was replaced by Murder 1<sup>st</sup> degree and the authorized sentences were the death penalty or life without parole. Prior to October 1984 Murder 1<sup>st</sup> degree had an authorized sentence of life with parole eligibility. The death penalty analysis for Murder 1<sup>st</sup> degree includes sentences of capital murder but excludes sentences of Murder 1<sup>st</sup> degree for offenses committed prior to October 1984. The sentencing data used in this review uses the first sentencing decision. Following appeals against the death penalty the original decision may be later reversed.

### Admissions for Murder

Since FY95 prison admissions for Murder have been declining but with a spike in FY09. Admissions in FY12 were similar to those in FY85.

Murder 1<sup>st</sup> degree admissions as a percent of all murder conviction has continued to decline since the spike in FY97 when it accounted for 38% of murder admissions. In FY12 the percentage was 21%.

### The application of the death penalty

In January 2006 a decision by a US District Court on the constitutionality of Missouri's method of execution placed a moratorium on executions. The 8<sup>th</sup> Circuit Courts of Appeals vacated that decision in June 2008. The last execution in Missouri at the time of this review (January 2013) was in February 2011. Although the percentage of offenders

convicted of Murder 1<sup>st</sup> degree and sentenced to death has fluctuated from year to year, the trend since the middle 1980s has generally been downwards. In FY06 and in FY11 there were no offenders received by the DOC and only three have been admitted since FY09.

### Is there racial disparity in the application of the death penalty?

Commitment rates for murder indicate that Blacks are eleven times more likely to be convicted of murder than Other Races.

#### **Average Annual Murder Commitment Rates per 100,000 population**

	FY85-FY97	FY98-FY12	FY12
Black	17.1	12.7	16.0
Other Races	1.6	1.3	1.4
Total	3.5	2.6	3.1

Commitment rate is:

Annual admissions for murder/Missouri population \*100,000

Missouri Population: US Bureau of Census 1990, 2000, 2011

The indicators used to measure racial disparity in the application of the death penalty are:

- The percent of offenders convicted of Murder I that receive the death penalty
- The percent of offenders who are convicted of Murder who are sentenced to Murder 1<sup>st</sup>.

The two measures indicate that Other Races are more likely to be convicted of Murder 1<sup>st</sup> and to receive the death penalty than Blacks. From FY85 to FY97 11.6% of Blacks convicted of Murder 1<sup>st</sup> degree received the death sentence compared to 20.4% of Other Races. In the period FY98-FY12 3.7% of Blacks convicted of Murder 1<sup>st</sup> degree received the death sentence compared to 7.2% of Other Races. .

Is there a racial disparity by sentencing county in death penalty cases?

During the period FY98-FY12 only the First class counties sentenced a higher proportion of Blacks to the death sentence than Other Races but the difference was not significant because of the small numbers.

## 7. RECIDIVISM AND SENTENCING DISPOSITION

The Sentencing Commission is aware that a prison sentence is not always the sentence that has the best chance of success in reducing future recidivism. Prison can reinforce criminal behavior and permanently damage family, social and employment connections. Identifying alternative non-prison sentences that enable community rehabilitation to occur is an important responsibility for the Commission. The following Commission study of recidivism examines the relationship between recidivism and the type of sentence and the effect of prior criminal history on rehabilitation.

The study uses data from the Department of Corrections of offenders received for a new felony offense between July 1997 and June 2012. Two measures of recidivism are calculated:

- The first incarceration following the start of a new probation or a release from prison. The incarceration may be for a technical violation while on probation or parole or for a new sentence.
- The first new conviction following the start of a new probation or a release from prison. The new conviction may be a prison or probation sentence supervised by the Department of Corrections.

The time period for the study at 15 years is long but there needs to be a sufficient number of offenders who have been incarcerated and released at least five years in order to calculate five year recidivism rates for all offenders, irrespective of sentencing disposition.

### Recidivism Rates for Probation compared to Prison

The first analysis compares recidivism of offenders sentenced to probation with recidivism by offenders sentenced and released from prison.

### Average Recidivism Rates for Offenders with New Sentences FY97-FY12

Actual Sentence	Sentences	Released 5 years+	Percent in Prison within					Percent with new conviction within				
			6 mths	12 mths	2 yrs	3 yrs	5 yrs	6 mths	12 mths	2 yrs	3 yrs	5 yrs

The data shows that offenders sentenced to probation have lower recidivism rates than prison based sentences. After five years probationers are two-thirds less likely to be later incarcerated than offenders released from prison and two-thirds less likely to be convicted of a new offense.

### The Impact of Prior Criminal History on Recidivism

The recidivism analysis indicates that both the incarceration rate and the new conviction rate increase with increasing prior criminal history. The incarceration rate for Level 5 offenders, however, has almost leveled off at nearly 70%. Incarceration rates are generally higher than new conviction rates because of revocations of probation and parole for technical violations of supervision, including arrests for new offenses but without new charges being filed.

### The Impact of Prior Criminal History on Probation or Prison Outcomes

If recidivism increases with prior criminal history but probation sentences generally result in lower recidivism it is useful to calculate at what level of prior criminal history does probation cease to be the low recidivism sentence.

### Recidivism Rates After Two Years by Type of Sentence and Prior Criminal History FY97-FY12

Sentence	Prior Criminal History Level				
	I	2	3	4	5
	No Prior Felonies, no more than 3 misd.	1/2 felonies, no incarceration	1 incarceration or 3 felonies	2 incarcerations or 4 felonies	3+ incarcerations or 5+ felonies
Probation	18.8%	25.9%	34.8%	39.5%	39.5%
Shk/Trt	29.3%	35.6%	39.8%	45.5%	48.0%
Prison	34.6%	41.3%	45.2%	47.3%	44.3%
Average	20.8%	31.2%	39.8%	44.1%	43.5%
Recidivism Gap Prison Rate less Probation Rate	 15.8%	 15.4%	 10.4%	 7.8%	 4.8%

From the analysis of FY97-FY12 new sentencing there is a 15.8% reduction in recidivism after two years between Level 1 and for Level 2 offenders sentenced to probation compared to those sentenced to prison the reduction is 15.4%. For Level 5 offenders the gap between probation and prison recidivism is less than 5%. It is important to note that these rates were calculated from actual sentencing and not from a statistically matched comparison sample. There may be factors that influenced the sentencing decision to grant probation to an offender with considerable prior criminal history and it is these factors that predicted the lower recidivism outcomes.

## Notes

\* Recidivism calculation: CHRG indicates that the recidivism rates are based upon the number of offenders sentenced for the charge code. GROUP indicates that the incarceration rates were based upon the numbers sentenced for the offense group and felony class group (A/B or C/D) of the offense. The offense group aggregation is used when the number of offenses in a prior criminal history level is less than 200.

Care should be exercised in interpreting the statistics, particularly when the numbers in the study are low. Although the study has used a 14 year time frame the numbers of offenders sentenced to prison for serious violent and sex offenses and released at least two years may be very small. For non-violent offenses the study size is sufficient for rates to be calculated for specific offenses.

## **APPENDIX 1**

### **Felony Sentences, Percent disposition and average sentence From Fiscal Year 2007 to Fiscal Year 2012**

The sentencing data is extracted from the DOC OPII database and includes the first sentence for unrelated sentences in Missouri courts. Related sentences is are sentences handed down at the same court and on the same day for the same offender. Where there is more than one related sentence, the most serious sentence is selected. Revocations of sentences are not included. Prison sentences include only sentences for a term sentence (commitment). SES probation and 120 day probation sentences are not included in the prison sentence length averages.

## APPENDIX 2

### Authorizing Statute: Section 558.019, RSMo

6. (1) A sentencing advisory commission is hereby created to consist of eleven members. One member shall be appointed by the speaker of the house. One member shall be appointed by the president pro tem of the senate. One member shall be the director of the department of corrections. Six members shall be appointed by and serve at the pleasure of the governor from among the following: the public defender commission; private citizens; a private member of the Missouri Bar; the board of probation and parole; and a prosecutor. Two members shall be appointed by the supreme court, one from a metropolitan area and one from a rural area. All members shall be appointed to a four-year term. All members of the sentencing commission appointed prior to August 28, 1994, shall continue to serve on the sentencing advisory commission at the pleasure of the governor.

(2) The commission shall study sentencing practices in the circuit courts throughout the state for the purpose of determining whether and to what extent disparities exist among the various circuit courts with respect to the length of sentences imposed and the use of probation for offenders convicted of the same or similar crimes and with similar criminal histories. The commission shall also study and examine whether and to what extent sentencing disparity among economic and social classes exists in relation to the sentence of death and if so, the reasons therefor sentences are comparable to other states, if the length of the sentence is appropriate, and the rate of rehabilitation based on sentence. It shall compile statistics, examine cases, draw conclusions, and perform other duties relevant to the research and investigation of disparities in death penalty sentencing among economic and social classes.

(3) The commission shall study alternative sentences, prison work programs, work release, home-based incarceration, probation and parole options, and any other programs and report the feasibility of these options in Missouri.

(4) The governor shall select a chairperson who shall call meetings of the commission as required or permitted pursuant to the purpose of the sentencing commission.

(5) The members of the commission shall not receive compensation for their duties on the commission, but shall be reimbursed for actual and necessary expenses incurred in the performance of these duties and for which they are not reimbursed by reason of their other paid positions.

(6) The circuit and associate circuit courts of this state, the office of the state courts administrator, the department of public safety, and the department of corrections shall cooperate with the commission by providing information or access to information needed by the commission. The office of the state courts administrator will provide needed staffing resources.

7. Courts shall retain discretion to lower or exceed the sentence recommended by the commission as otherwise allowable by law, and to order restorative justice methods, when applicable.

8. If the imposition or execution of a sentence is suspended, the court may order any or all of the following restorative justice methods, or any other method that the court finds just or appropriate:

- (1) Restitution to any victim or a statutorily created fund for costs incurred as a result of the offender's actions;
- (2) Offender treatment programs;
- (3) Mandatory community service;
- (4) Work release programs in local facilities; and
- (5) Community-based residential and nonresidential programs.

9. The provisions of this section shall apply only to offenses occurring on or after August 28, 2003.

10. Pursuant to subdivision (1) of subsection 8 of this section, the court may order the assessment and payment of a designated amount of restitution to a county law enforcement restitution fund established by the county commission pursuant to section 50.565. Such contribution shall not exceed three hundred dollars for any charged offense. Any restitution moneys deposited into the county law enforcement restitution fund pursuant to this section shall only be expended pursuant to the provisions of section 50.565.

11. A judge may order payment to a restitution fund only if such fund had been created by ordinance or resolution of a county of the state of Missouri prior to sentencing. A judge shall not have any direct supervisory authority or administrative control over any fund to which the judge is ordering a defendant to make payment.

12. A defendant who fails to make a payment to a county law enforcement restitution fund may not have his or her probation revoked solely for failing to make such payment unless the judge, after evidentiary hearing, makes a finding supported by a preponderance of the evidence that the defendant either willfully refused to make the payment or that the defendant willfully, intentionally, and purposefully failed to make sufficient bona fide efforts to acquire the resources to pay.

13. Nothing in this section shall be construed to allow the sentencing advisory commission to issue recommended sentences in specific cases pending in the courts of this state.
